

Nescens Stem Cell Advanced Program Nescens Clinique de Genolier (4 days / 4 nights)

Discover the power of your own Stem Cells with our Exclusive Nescens Stem Cell & Check-up Program.

Preventive Check-ups is one of the most effective ways of diagnosing health problems and helping you to make changes to improve the quality of your life and healthier aging. Together with our stem cells program you can take immediate action against fine lines and wrinkles by having your stem cells returned for re-infusion within 24 hours. Numerous scientific studies show that stem cell injections together with lipofilling, stimulate the production of collagen and effectively reduce the visible signs of aging.

Advanced check-up Nescens

• Medical consultations

1. Initial consultation: anamnesis and complete physical examination (+ gynaecologic examination and consultation, women)
2. Final consultation: presentation of the first results, diagnosis and preventive medicine action plan
3. Complete written report (by express mail within 3 weeks after the check-up)

• Laboratory analyses over 30 markers including

Standard biological parameters, metabolic markers, markers of the cardio-vascular risk, tumour markers, hormonal measurements, vitamin dosages, urine analysis (sediment, total proteins, micro-albumin), pap smear (women)

• Diagnostic imaging

CT scan (chest, abdomen and pelvis), coronary calcium scoring, angio-CT of the coronary arteries, angio-CT of the supra-aortic arteries, endo-vaginal ultrasound examination (women), breast ultrasound examination (women)
